As a Salesforce Developer with internship experience, I'm seeking opportunities to grow and contribute to an organization. Eager to enhance my skills and be part of a team that values innovation and collaboration

PROFESSIONAL SUMMARY

- Skilled in Salesforce **administration**, including **security model** and user management.
- Proficient in design, **development**, testing, and deployment ofrobust business solutions.
- Creation of **Users, Roles and Profiles, Permission Sets, and applying securities** at all levels.
- Skilled in creating **Apex Triggers**, Classes, Batch Processes, and Controllers, including Asynchronous Apex.
- Have good experience working with **SOQL.**
- Proficient in creating captivating user interfaces using **Lightning Web Components (LWC) and Lightning Web Runtime (LWR)**
- Extensive expertise in **HTML, CSS, JavaScript**, and APEX, enhancing Salesforce applications.
- Proficient in **Object-Oriented Programming (OOP)** concepts, ensuring efficient and maintainable codebases.
- Engages in **Agile methodologies** like Scrum, contributing to code walkthroughs, reviews, and project alignment.
- Proactive self-starter dedicated to project ownership and **client relationship** development.
- Collaborative team player experienced in Agile development teams, achieving project milestones through **effective communication and collaboration**

PROFESSIONAL EXPERIENCE

1. **Hudl India Pvt.Ltd Pune:**   **July 2020 to 2021-09**
   Sport Analyst

   Games played worldwide were recorded or broadcasted by individual coaches, then transferred for testing and analysis. We tracked every player's move and prepared detailed performance cases. These stats were then sent back to the respective team coaches.

2. **Premium Learning System Private Limited:**   **December 2023 to Present**

   Role: - **Salesforce Developer (Intern)**

   Responsibilities: -

- Analysis of requirements or enhancements & participation in designing and its development.
- Responsible for end-to-end delivery
- Working independently as a contributor
- Facilitating Doubt Resolution and Providing Support within the Community
- Actively involved in testing of the project
- Created LWC project which contains **7 projects** where I have used **apex class, triggers, flow to send notification, record form, showToastEvents, Navigation, LWR, Sharing** Setting Rule, Permission Rules, Created Users, My Domain Setting, Integration etc.

TECHNICAL EXPERTISE

- Salesforce Administration
- Apex Programming
- JavaScript
- REST & SOAP API

- Lightning Web Component
- Asynchronous Apex
- HTML & CSS
- SOQL & SOSL
- Core Java

EDUCATION

Bachelor of Engineering: Electronics and Telecommunication

Modern Education Society College of Engineering - Pune

PROJECTS

1. Smart Alarm Clock

Project Description: -

Our project leverages the Lightning Web Runtime (LWR) and Lightning Experience to deliver a sleek, modern user interface. By utilizing JavaScript and HTML, we're crafting logic-driven functionalities without the need for a data table. With Lightning Experience, users can enjoy a fast, visually appealing interface, while LWR empowers developers with cutting-edge web technologies for building dynamic, lightweight applications.

Key Implementation Expertise: -

- Component Creation and Layout Designing: Develop LWCs with efficient layout design for intuitive user interfaces.
- Reusable Component Development: Build modular components for code reusability and easy integration.
- Alarm Functionality Logic in JavaScript: Engineer robust JS logic for alarm management

2. Hotel Reservation Management Application

Project Description: -

Building a Hotel Reservation Management App on Salesforce. Create a new Developer Edition org. Develop a data model, automate business processes, and use Apex Triggers, Asynchronous Apex, and LWC components.

Key Implementation Expertise: -

- Data Model Design: Create schemas for rooms, customers, and reservations to organize data effectively.
- Business Process Automation: Utilization of Salesforce Flow for streamlined processes.
- Lightning Web Components: Development for intuitive user interfaces.
- Deployment and App Creation: Create Lightning Apps for seamless deployment and management of the Hotel Reservation Management Application.

3. Wellness Calculator

Project Description: -

Implementing the Wellness Calculator project using Lightning Web Runtime (LWR) and Lightning Experience to create a modern BMI calculator. Leveraging JavaScript and HTML for user-friendly BMI calculations based on weight and height inputs. Empowering individuals and healthcare professionals for convenient weight status assessment.

Key Implementation Expertise: -
- Layout Design: Design intuitive user interfaces by structuring components effectively.
- Form with HTML Validation: Implement HTML form elements with validation to ensure accurate user input.
- Wellness Calculator Logic: Develop JavaScript logic to calculate BMI accurately based on weight and height inputs for a seamless user experience.

4. Quick Note Application

Project Description: -

The project involves the development of a note-taking application with a focus on enhancing user productivity and satisfaction. Intuitive components and a streamlined layout were crafted to facilitate efficient note-taking, promoting user engagement. Robust data modeling techniques were implemented to ensure seamless organization and management of user- generated content, thereby optimizing data integrity.

Key Implementation Expertise:-
- Intuitive Component Development: Streamlined note-taking processes.
- Robust Data Modeling: Efficient organization and management of user-generated.
- Visual Design Enhancement: Visually appealing interface using SLDS icons and CSS.
- Modal Popup Integration: Enhanced functionality for improved user experience.

5. Chat GPT Integration

Project Description: -

Integrated Lightning Web Components with external APIs for real-time communication with Chat GPT, boosting chat app capabilities with natural language processing. Configured remote site settings for secure communication, maintaining data privacy between Salesforce and external APIs

Key Implementation Expertise: -
- Integrated Lightning Web Components with external APIs for real-time Chat GPT communication.
- Secured remote site settings for data exchange between Salesforce and external APIs.
- Utilized custom settings for flexible parameter management within the application
- Employed REST API techniques for efficient data exchange between Salesforce and externalservices.

6. Weather Forecast API

<u>Project Description</u>: -

Developing a user-centric Weather Forecast application with real-time updates. Integrating Lightning Web Runtime (LWR) and Lightning Experience for a modern user interface. Offering weather updates based on location or user-specified cities.

<u>Key Implementation Expertise</u>:-
- Utilized LWR to create a lightweight and responsive web application environment.
- Expertise in crafting modern user interfaces, enhancing user interaction and experience.
- Integrate real-time weather updates, enhancing data processing and user interactions
- Established robust communication protocols for integrating weather data from external APIs, ensuring accuracy and reliability.

7. Portfolio Builder

<u>Project Description</u>: -

The application provides relevant information to potential employers about your skills, experience, and projects you've worked on. Your portfolio builder is like your online resume. Potential clients and hiring managers can easily find you online and check out your previous projects and skills.

<u>Key Implementation Expertise</u>:-
- Component Creation and Layout Designing
- Styling CSS, SLDS Library
- Data Model(Custom object and fields)
- Use of Wire Adapter and Component communication
- Sharing Setting and Profile Setting
